## Logo & Identitas Kita

Our Logo & Identity

---

## OUR LOGO & IDENTITY

---

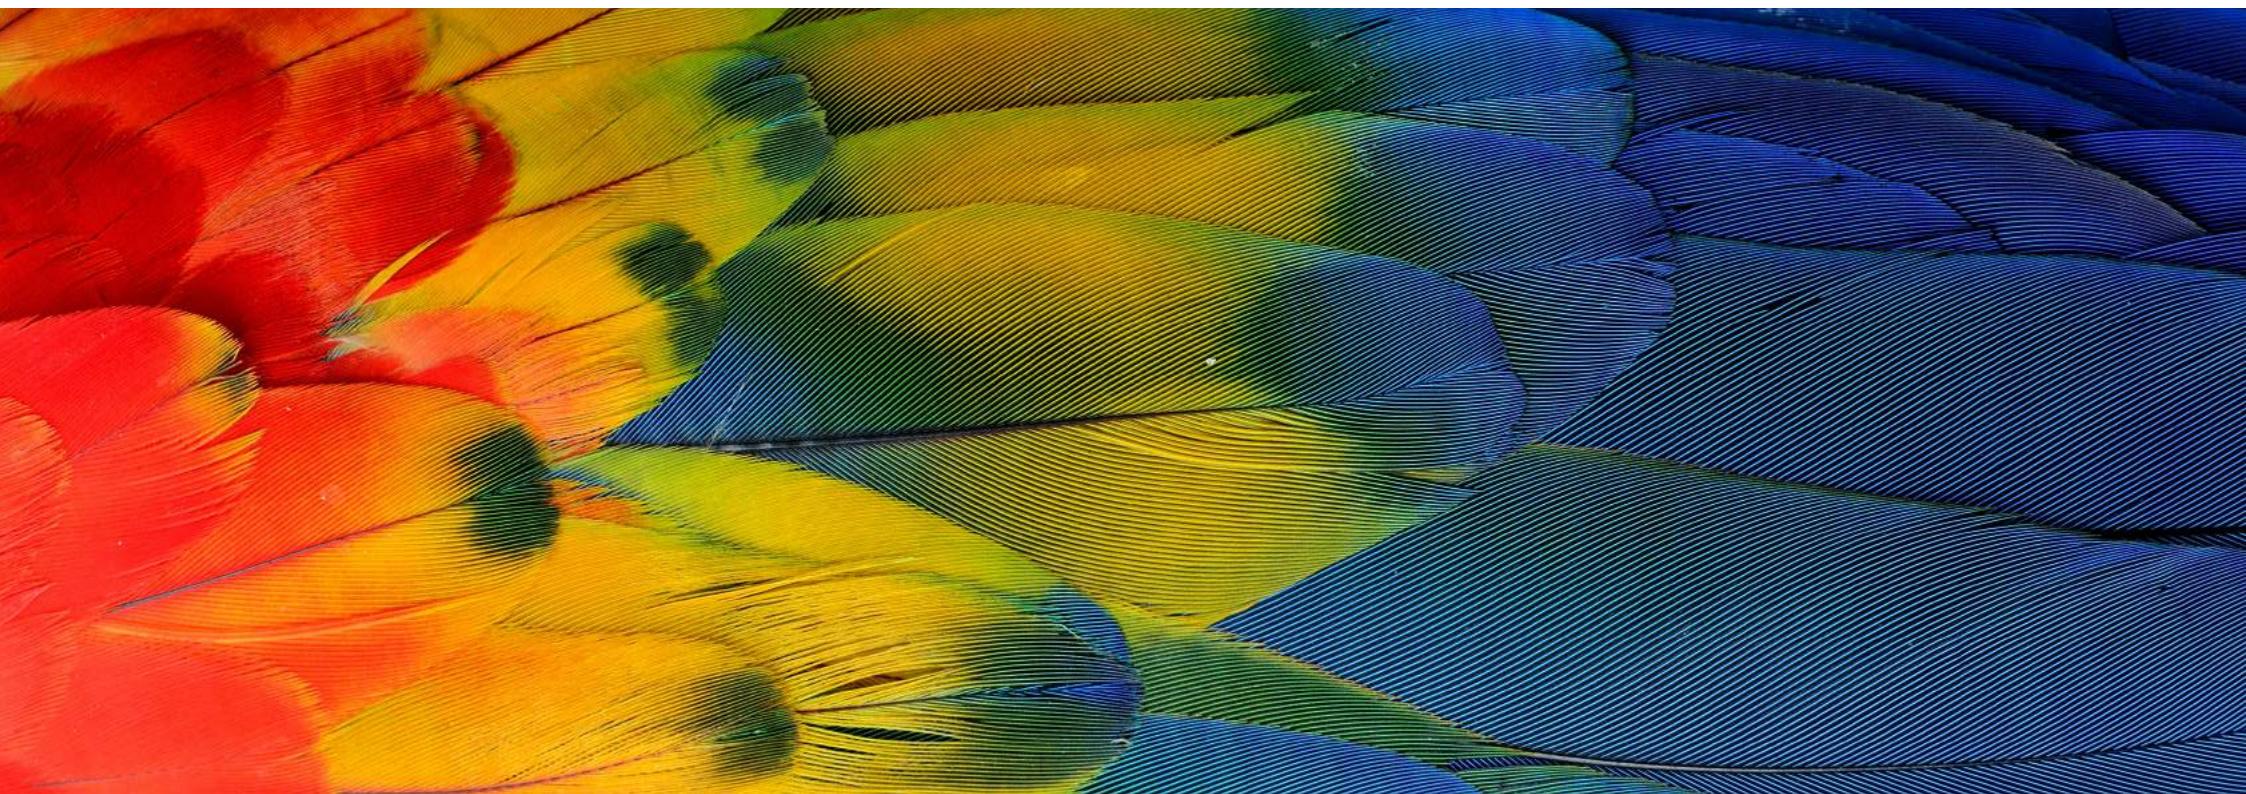

### Logo Rationale

Burung yang suka berkelompok melambangkan hidup damai antar sesama di alam sentosa. Burung juga satwa dengan populasi terbesar di Indonesia dan salah satu dari mereka menjadi lambang bangsa. Rentangan sayap menggambarkan keterbukaan, hasrat untuk terbang jauh, melintas batas. Sifatnya semesta, dikenali oleh semua.

Warna dari tulisan “Indonesia” harus lebih gelap daripada “Wonderful” untuk mengedepankan dan memperkuat Indonesia diantara persaingan pariwisata internasional.

The gregarious bird symbolizes the peaceful connection between the people living in this tranquil natural archipelago. Birds are also the animal with the highest population in Indonesia and one of them represents the symbol of the nation. Spanned wings show openness, a desire to fly away across borders. Universal by nature, its wonder should be easily recognized by all.

The word “**Indonesia**” should be darker in color compared to the “**Wonderful**” to accentuate and underline the advantages of Indonesian tourism among other international destinations.

---

## Color Philosophy

Lambang burung mempunyai lima warna bulu yang berbeda, yang masing-masing mewakili makna sebagai berikut:

**Jingga** : Inovasi, Semangat Pembaruan, dan Keterbukaan.

**Biru** : Kesemestaan, Kedamaian, dan Keteguhan.

**Magenta** : Keseimbangan, Akal Sehat, dan Sifat Praktis.

The bird logo has five different color components, with each having their own meanings:

**Green** : Creativity, Natural Friendliness and Alignment.

**Purple** : Imagination, Belief System, Physical and Mental Unity.

**Orange** : Innovation, Spirit of Rejuvenation, and Openness.

**Blue** : Universality, Peacefulness, and Determination.

**Magenta** : Balance, Common Sense, and Practical Matters.

Ruang kosong adalah jarak minimal area untuk mengelilingi logo yang harus dibiarkan kosong dari segala elemen visual dan teks. Apabila memungkinkan, buatlah ruang kosong yang lebih luas dibanding syarat minimumnya, tetapi jangan pernah dipersempit.

Clear space is the minimum area surrounding the logo which must remain clear of any other visual elements or text. Each of the logo configurations uses the cap height measurement (**A**) to determine its clear space. Where possible, create more clear space than the minimum requirements, but never less.

### Pattern Application On Various Media Templates

Pada halaman *Visual System Components* bagian ini akan dijelaskan penggunaan *pattern* pada versi vertikal dan horizontal. Ingatlah bahwa halaman ini sangat krusial untuk segala eksekusi *pattern*.

#### 1 Headline

Selalu ingat bahwa saat memakai *patterns* pada media, ukuran font *headline* selalu lebih besar dari media yang memakai foto, memasang *headline* menutupi *pattern* atau sebaliknya tidak disarankan.

#### 2 Patterns & Colour

Selalu ingat bahwa *patterns* tidak bisa menutup *bounding box* secara solid, dan harus ada pemudaran warna di tengah. Warna latar juga harus ditransformasikan melalui gradasi.

#### 3 Supergraphic

Selalu ingat bahwa *supergraphic* adalah pembatas antara *patterns* dan area *copy & logo*. Penggunaan *pattern* yang menutupi *supergraphic* atau area *copy & logo* tidak disarankan.

This section of visual system components will provide an explanation over pattern usage in vertical and horizontal versions. Bear in mind that this pattern section is crucial for every pattern execution.

#### 1 Headline

Always remember that when applying patterns in media, the headline size is always bigger than in mediums that use images. Placing the headlines over the pattern and vice versa is not recommended.

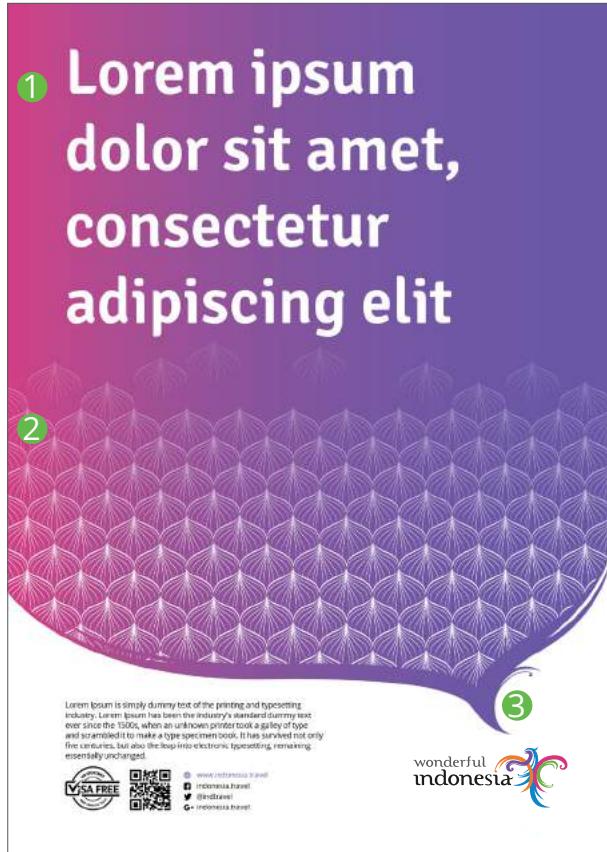

#### 2 Patterns & Colour

#### 3 Supergraphic

Always remember that supergraphic is the boundary between patterns and the copy & logo area. Using patterns over the supergraphic or the copy & logo area is not recommended.

### Patterns Transition Technique on Template

Berikut ini adalah aturan *patterns* proportion yang akan diaplikasikan ke setiap media, terutama informasi tentang tata penggunaan *pattern* dengan keselarasan. Pembagian area *pattern* telah dipastikan untuk memudahkan pengguna dalam menggunakan *pattern* di setiap aplikasi media.

Kejelasan bentuk *pattern* di dalam *bounding box* dibatasi sampai 50% dari seluruh ruang, di atas itu, *patterns* harus dipudarkan sampai hampir tidak terlihat sama sekali. Tidak disarankan untuk mengisi seluruh ruang *bounding box* dengan *pattern*.

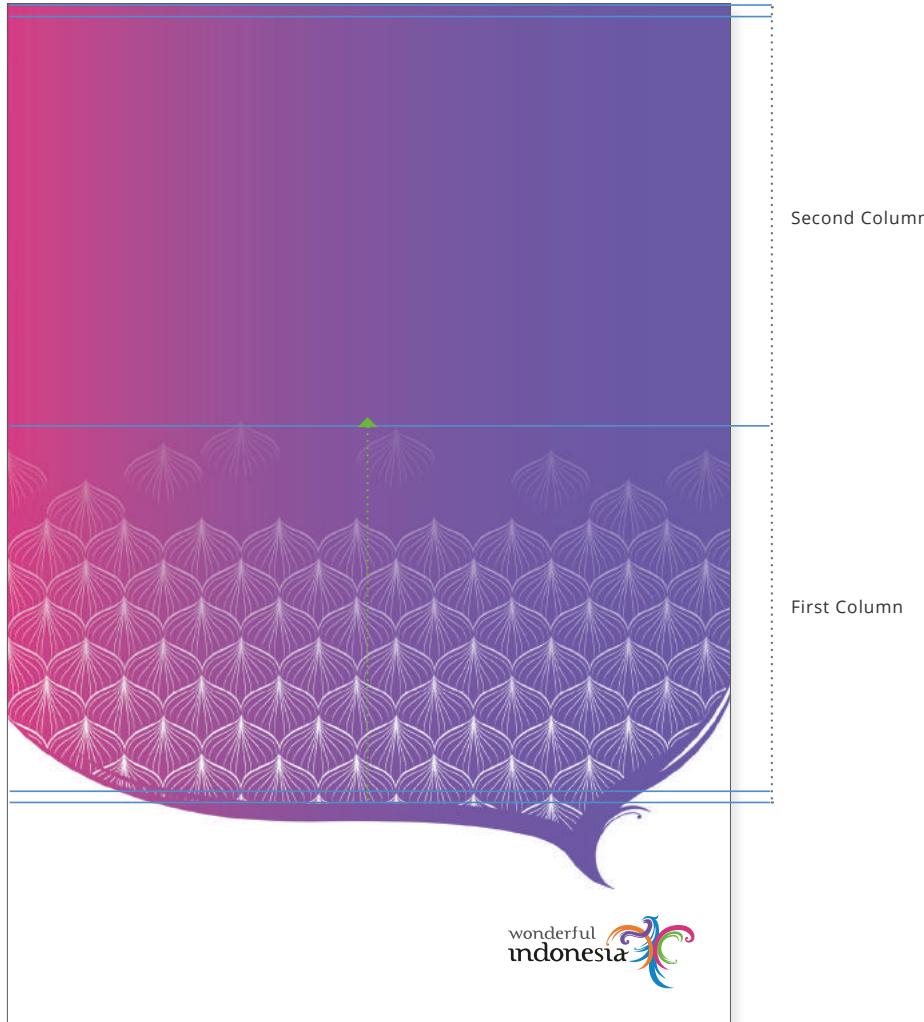

Peraturan ini berlaku kepada semua versi ukuran, dan arah *pattern*. Arah *pattern* mempunyai dua opsi, dari bawah keatas dan dari kanan ke kiri. Tidak disarankan untuk mengubah arah *pattern* melawan opsi yang telah disediakan.

The following explains the pattern proportion rule that will be applied into every medium. It provides information on how to use the patterns accordingly. We have established the pattern divider to simplify the application of patterns in different mediums.

The clear visibility of the patterns inside the bounding box is limited to 50% of total space, above that, the patterns must be faded until it is barely visible to not at all. It is not recommended to fill all the space of the bounding box with patterns.

This rule applies to every version of sizing, and the direction of the patterns. The direction of the patterns has two options, bottom to top, and right to left. It is not recommended to change the direction of the patterns against the options available.

#### ► Bottom to Top Version of Patterns Usage

#### Transition Technique:

Aplikasi transisi *pattern* 1 bergerak dari bawah ke atas. Kami telah membagi area gambar menjadi 50-50 dengan dua kolom, yang ditaruh di dalam *supergraphic* (seperti yang diaplikasikan di gambar kiri). Sistem pembagian ini berlaku untuk setiap aplikasi media (*stationery, print, online, media ruang*). Kolom pertama adalah area aman untuk menggunakan *pattern* sampai *pattern* menghilang. Ingatlah bahwa *pattern* tidak bisa melebihi kolom pertama dan pemakaiannya harus disesuaikan dengan konten media, karena kolom kedua adalah area aman untuk penggunaan *headline* dan informasi lainnya.

Pattern transition application 1 moves from bottom to top. We have divided the image area into a 50-50 area with two columns, which is placed within the supergraphic (as applied on the left image). This dividing system applies to every media application (stationery, print, online, out-of-home). The first column is the safe area to use the pattern until it is faded out. Keep in mind that the patterns cannot go over the first column and that its use must be adjusted according to the media contents, because the second column is the safe area for headlines and other informations.

### Patterns Usage & Policies

Saat partner menjadi *brand* utama, identitas *brand* harus dijaga sekonsisten mungkin namun tetap dapat mengikuti identitas partner secara fleksibel. Kita melakukan ini untuk menghormati citra mereka sambil tetap mempertahankan citra kita agar tetap konsisten.

Peraturan ini tidak terbatas kepada *pattern*, terutama saat warna, *layout* dan desain dari *brand* partner berseberangan dengan *guideline pattern Wonderful Indonesia*.

Meskipun kami akan menuntun anda tentang bagaimana memakaikan *pattern* secara benar dalam *brand* yang berbeda-beda, peraturan ini subjektif kepada identitas *brand* partner dan maka dari itu juga harus didiskusikan dengan mereka.

Peraturan ini kebanyakan diaplikasikan ke kategori transportasi, walaupun ada media-media lain yang membutuhkan penyelarasian kepada identitas partner, kebanyakan media yang digunakan bersama tidak memakai *pattern* sebagai elemen yang diperlukan.

When the partner is the lead brand, a brand identity should be kept as consistent as possible while flexibly following the partner's brand identity. We do this in order to respect their image while maintaining ours from becoming inconsistent.

This rule is no exception when applied to patterns, especially when the color, layout and design of the partner's brand clashes with the Wonderful Indonesia's pattern guidelines.

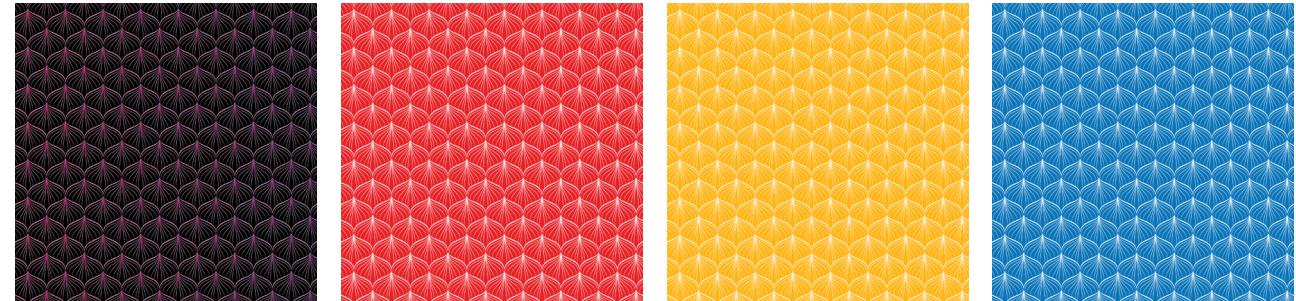

Although we will guide you to use the patterns correctly on different brand identities, this rule is subject to the partner's brand identity and therefore should be discussed with them.

This policy is mostly applied to the transportation category. Although there are other mediums that require abiding the partner's identity, most of the mediums don't use patterns as a necessary element.

## ► Color Considerations For Patterns

Banyak *brand* dunia yang memakai warna berbeda-beda untuk menyampaikan karakteristik utama mereka. Warna-warna ini seringkali menjadi kontras terhadap warna *thematic wonders* dari *Wonderful Indonesia*. Dalam situasi seperti ini, warna *thematic* tidak bisa dipakai dan harus disubstitusikan ke warna putih agar dapat mendukung warna yang lebih dominan. Pengecualian terhadap peraturan ini hanya terdapat pada saat warna dominan dari *brand* partner adalah hitam dan/atau abu-abu.

Many big brands of the world have different colors conveying their key characteristics. These colors often contrasted the Wonderful Indonesia's thematic wonders colors. In these situations, the thematic colors can't be used and has to be substituted to white in order to support the dominant color. The only exception of this rule is when the partner's brand colors are black and/or grey.

Pattern application examples on most usable brand colors

## ► Example usage on transportation

Ada beberapa contoh dari aplikasi peraturan ini pada kategori transportasi, pada saat mitra menjadi *brand* utama (gambar di kanan).

## Copywriting Concept For Mediums

### Print Media

*Headline* pada media *print* menggunakan kalimat yang jelas namun padat yang mengkomunikasikan pesan secara lengkap. Media *print* berperan sebagai medium komunikasi utama dari seluruh *campaign* dan dapat diperjelas dengan *body copy*.

Kami menggunakan *WPM (words per minute)* sebagai standar penggunaan *copy*. Pada *headline* media *print*, kami merekomendasikan untuk menggunakan jumlah maksimal 8 kata agar tetap menarik perhatian pembaca pada umumnya. Kecuali pada saat menargetkan audiens yang spesifik, di mana jumlah maksimal kata bisa diperbanyak menjadi 15.

Pada *body copy*, tidak ada batas tentang seberapa panjang anda bertutur, namun *layout* media *print* perlu diperhatikan agar tidak melewati batas saat membuat *body copy*.

Ingatlah bahwa peraturan *WPM* bervariasi sesuai dengan bahasa (pada kasus ini kami menggunakan *WPM* bahasa Inggris). Saat membuat *copy* dengan bahasa lain, perhatikan saja kemampuan membaca audiens pada negara tersebut.

The print media headline uses a clear yet compact sentence that communicates the message as a whole. The print media acts as the main communication medium for the whole campaign and can be made clearer with a body copy.

We use WPM (words per minute) as a standard for writing copy. In print media headlines, we recommend you to use maximum of 8 words in order to keep the average readers interested. Unless when targeting a specific audience, in which the amount of words can be extended to 15.

In body copy, there is no limit to what you can communicate, but it is very important to mind the print media layout so you don't go overboard with too many words.

Keep in mind that the WPM rule varies in every language (in this case we use English WPM). When applying copy in another language, just be mindful of the average reader's ability in that country.

## Copywriting Concept For Mediums

### Online Media

*Headline* media online menggunakan kalimat yang lebih tertuju dan sederhana dan mengkomunikasikan pesan sebagai *teaser*. Media online berperan sebagai medium pendukung dalam *campaign* dan tidak bisa menggunakan *body copy* karena ruang keterbacaan yang terbatas

Kami menggunakan *WPM (words per minute)* sebagai standar penggunaan *copy*. Pada *headline* media online, kami merekomendasikan untuk menggunakan jumlah maksimal 4-6 kata agar tetap menarik perhatian pembaca pada umumnya. Kecuali pada saat menargetkan audiens yang spesifik atau mengkomunikasikan promo, dimana jumlah maksimal kata bisa diperbanyak menjadi 12.

*Headline* media online, terkecuali promo disarankan untuk menggunakan *headline* media *print* yang telah diperpendek demi menjaga konsistensi pesan.

Ingatlah bahwa peraturan *WPM* bervariasi sesuai dengan bahasa (pada kasus ini kami menggunakan *WPM* bahasa Inggris). Saat membuat *copy* dengan bahasa lain, perhatikan saja kemampuan membaca audiens pada negara tersebut.

The online media headline uses a simpler and more direct sentence that communicates the message as a teaser. The online media acts as a supporting medium for the whole campaign and cannot use a body copy because of the limited space for readability.

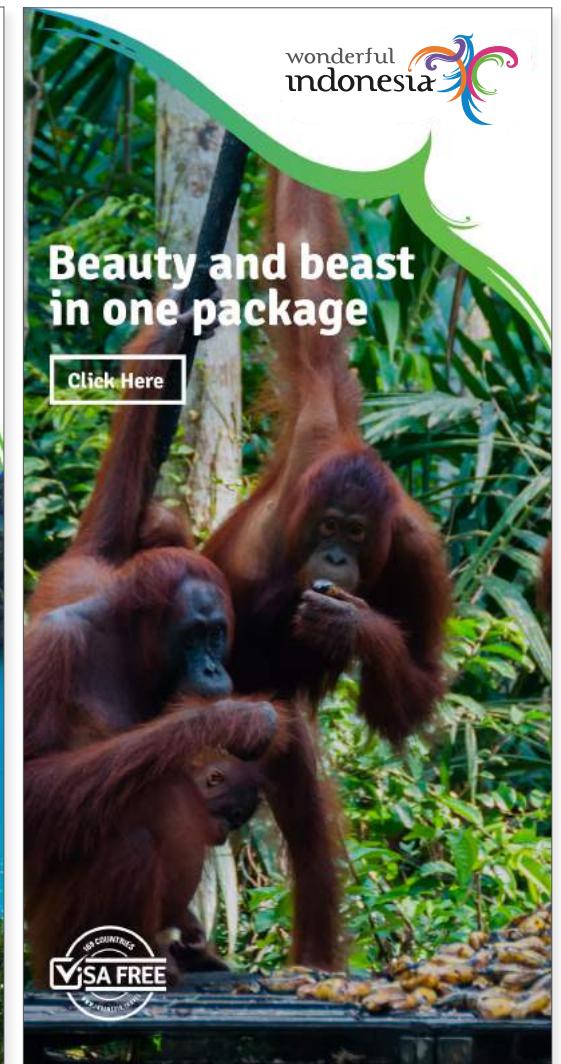

We use WPM (words per minute) as a standard for writing copy. In online media headlines, we recommend you to use maximum of 4-6 words in order to keep the average readers interested. Unless when targeting a specific audience or communicating promos, in which the amount of words can be extended to 12.

The online media headlines, except the promos are recommended use the shortened version of the print media headlines in order to maintain the consistency of the message.

Keep in mind that the WPM rule varies in every language (in this case we use English WPM). When applying copy in another language, just be mindful of the average reader's ability in that country.

Struktur dasar *grid* adalah sarana utama dalam mengorganisir hirarki informasi, yang disusun dalam struktur demi menjaga konsistensi dan menampilkan citra *brand* secara profesional di semua media.

Struktur dasar *grid* untuk *print ad Wonderful Indonesia* terbagi menjadi dua area utama: area *image* dan area *supergraphic*.

Logo ditaruh di bagian kanan bawah pada area *supergraphic*, dan segala informasi kontak dan promo yang sedang beredar ditaruh di bagian kiri bawah.

Ada dua versi dari struktur dasar *grid*:

1. *Full image*, yang digunakan untuk materi komunikasi utama.

2. *Pattern*, yang digunakan untuk materi komunikasi yang tidak mempromosikan *image*, *pattern* merupakan satu-satunya versi yang memposisikan *headline* di bagian atas area *image* dibanding di dalam area *supergraphic*. Di versi *pattern*, ukuran *font* untuk *headline* bisa jauh lebih besar dibanding *headline* pada versi *image*.

The basic grid structure is the primary vehicle in organizing hierarchy of information, which is arranged in a structure to maintain consistency and display the brand image professionally in every medium.

Wonderful Indonesia's basic grid structure for print ads consists of two primary areas: the image area and the supergraphic area.

The logo is placed on the lower right of the supergraphic area, and all the contact information and current promo are placed on the lower left.

There are two versions of the basic grid structure:

1. Full image, which is used for the primary communication material.

2. Pattern, which is used for communication materials that do not promote images. The pattern is the only version that places the headlines above the image area instead of within the supergraphic area. In the pattern version, the font size for headlines can be much larger than headlines on the image version.

The area in both versions are divided by the supergraphic, and uses a proportion of 70:30 between the image area and the supergraphic area. In cases of communication materials that cannot contain much information, the proportion can be enlarged to 80:20.

**Wonderful Indonesia without a Visa**

The government of Indonesia has extended a visa-free facility to 169 countries and territories.

Aside from the beautiful and exciting destinations, nothing lifts the mood of an avid traveler better than a free visa. After all, a visa-free facility eliminates one more barrier standing between a traveler and his destination. The government had previously granted visa-free status to neighboring Southeast Asian countries such as Thailand, Malaysia, Singapore, Brunei Darussalam, and the Philippines. Cambodia, Laos, Myanmar, Vietnam, as well as territories and countries, such as Hong Kong, Chile, Morocco, Peru and Ecuador, through presidential decree no. 69 of 2015. Later last year, it recently extended its visa-free facility to no fewer than 169 countries and territories.

The policy to grant visa-free facility to a much larger number of countries and territories was made as part of the government's efforts to boost the country's economy through tourism. The government has announced its aims to reach 20 million visitors by 2019. Presidential decree no. 21 of 2016, which was signed by President Joko Widodo on March 2 this year, details the policy's terms and conditions and encloses the list of countries.

Visitors from abroad 169 countries and territories, which include the United States and Australia, are required to have their passports with minimum validity of six months and a return ticket upon entry. Meanwhile, nationals of Afghanistan, Cameroon, Guinea, Israel, Liberia, Niger, Nigeria, North Korea, Pakistan and Somalia still need a visa approval from the immigration Office in Indonesia prior to their travel. The visa-free facility, which is granted for the purpose of leisure or tourism, social, cultural, governmental, educational, business meetings and transit visits, is valid for up to 30 days. It is non-extendable and non-convertible.

**Facebook (Carousel Ads)**

*Facebook carousel ads* adalah fitur yang memfasilitasi kita untuk menaruh gambar-gambar pada 4 buah kotak demi membuat iklan yang semi-interaktif. Kotak-kotak ini bisa diisi dengan satu gambar *horizontal* agar menjadi satukesatuan, atau dengan 4 gambar *square* yang berbeda untuk mengkomunikasikan berbagai pesan visual.

Pada setiap iklan, kami menyarankan untuk memakai gambar-gambar yang konteksnya berhubungan. Elemen bercerita atau pengurutan adalah cara pemakaian terbaik untuk fitur ini.

Fitur ini mengoptimalkan performa iklan melalui pemilihan dan pengurutan gambar-gambar terbaik untuk setiap orang yang melihat iklan kita.

The Facebook carousel ads is a feature that allows us to put multiple images into 4 boxes to make one semi-interactive ad. These boxes can either be filled with one horizontal image to make it look continuous, or with 4 different square images to communicate various visual messages.

It is recommended to use images that are related to one theme in each ad. Storytelling elements or sequencing would definitely work best in this feature.

This feature will optimize the performance of your ad by selecting and ordering the best-performing images for each person who sees our ad.

## Supergraphics in Out-of-Home Media

Seperti pada online *banner*, media ruang menggunakan *top right supergraphic*, sehingga mempunyai efektivitas pada penggunaan ruang *layout* dan empasis lebih besar pada logo.

Penggunaannya adalah absolut dan tidak bisa diganti dengan aplikasi *supergraphic* lain, agar dapat mengkomunikasikan identitas *brand Wonderful Indonesia* sekonsisten mungkin.

**Version A** pada bab ini menggunakan *top right supergraphic* dengan menempatkan bagian ujung sayap lebih tinggi sehingga menunjuk kata "*Wonderful*".

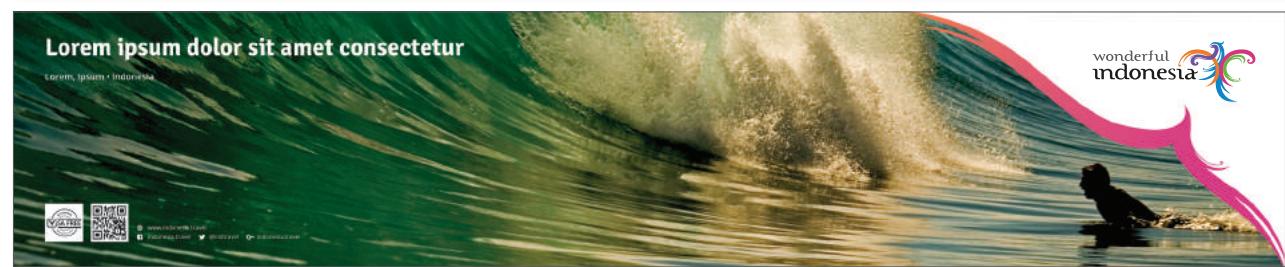

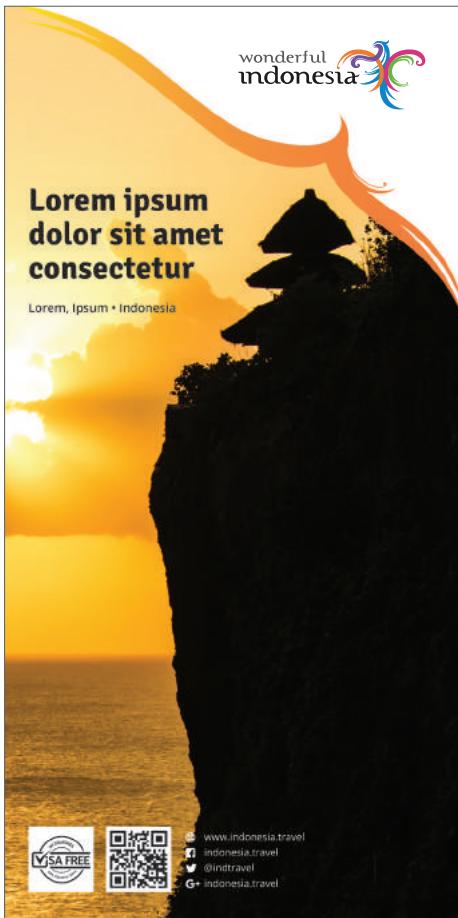

**Version B** pada bab ini menggunakan *top right supergraphic* dengan menempatkan bagian ujung sayap lebih rendah sehingga menunjuk kata "*Indonesia*".

As in the online banners, the out-of-home media uses the top right supergraphic to use the layout space more effectively and to put bigger emphasis on the logo.

Its use is absolute and must never be switched with any other supergraphic applications, in order to communicate the Wonderful Indonesia's brand identity as consistent as possible.

**Version A** of this section uses the top right supergraphic with a higher placement of the edge of the wing so that it points to the word "*Wonderful*".

**Version B** of this section uses the top right supergraphic with a lower placement of the edge of the wing so that it points to the word "*Indonesia*".

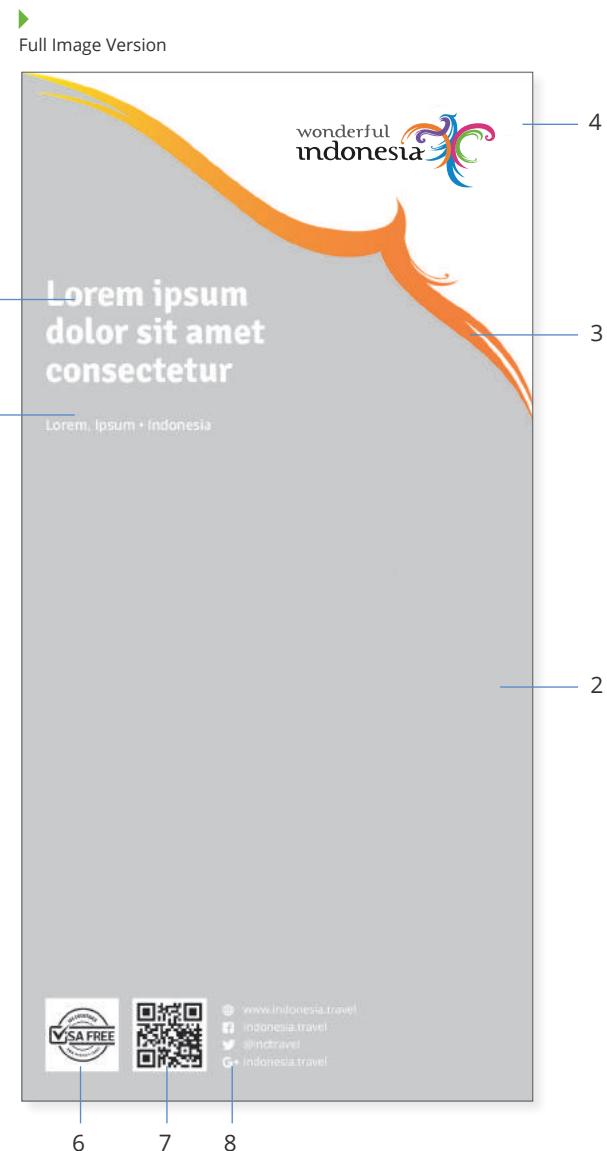

## Billboard Key Elements

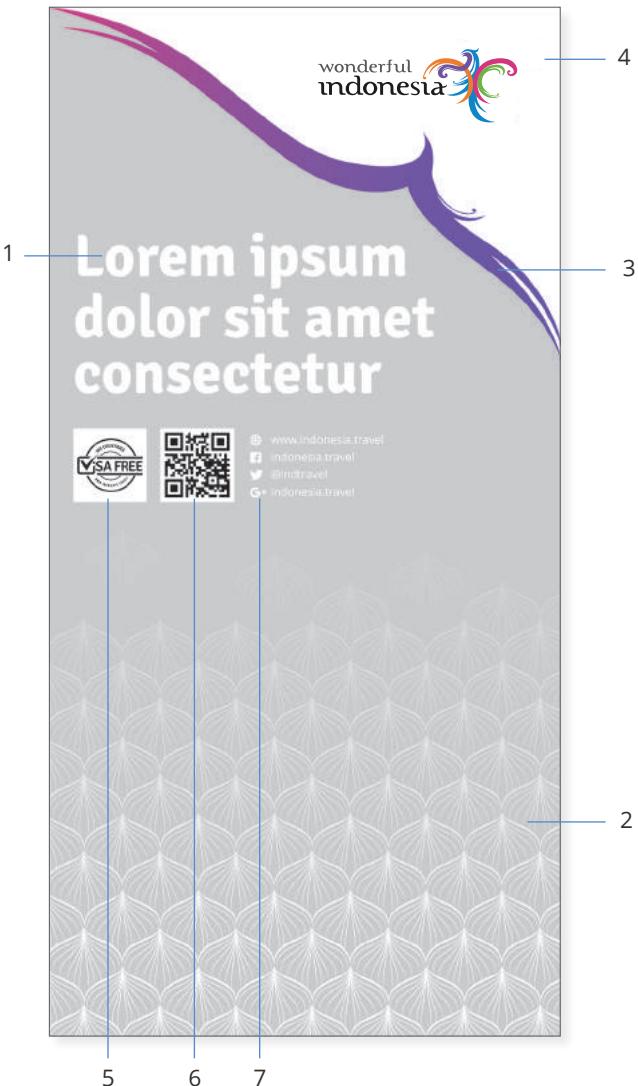

Berikut ini adalah elemen-elemen yang terdapat dalam media ruang *Wonderful Indonesia*, elemen-elemen ini disusun sesuai hirarki informasi yang kami sarankan.

## Basic Grid Structure

Struktur dasar *grid* adalah sarana utama dalam mengorganisir hirarki informasi, yang disusun dalam struktur demi menjaga konsistensi dan menampilkan citra *brand* secara profesional di semua media.

Struktur dasar *grid billboard Wonderful Indonesia* untuk media ruang terbagi menjadi dua area utama: area *image* dan area *supergraphic*.

Logo ditaruh di bagian kanan atas pada area *supergraphic*, sedangkan segala informasi kontak dan promo yang sedang beredar ditaruh di dalam area *image*.

Ada dua versi dari struktur dasar *grid*:

1. *Full image*, yang digunakan untuk materi komunikasi utama.

2. *Pattern*, yang digunakan untuk materi komunikasi yang tidak mempromosikan gambar. Di versi *pattern*, ukuran *font* untuk *headline* bisa jauh lebih besar dibanding *headline* pada versi *image*.

Area di kedua versi ini dipisahkan oleh *supergraphic*, memakai proporsi 70:30 antara area *image* dan area *supergraphic*.

The Basic grid structure is the primary vehicle in organizing hierarchy of information, which is arranged in a structure to maintain consistency and display the brand image professionally in every medium.

Wonderful Indonesia's basic grid structure for out-of-home media consists of two primary areas: the image area and the supergraphic area.

The logo is placed on the upper right of the supergraphic area, while all the contact information and current promo are placed on the image area.

There are two versions of the basic grid structure:

1. Full image, which is used for the primary communication material.

2. Pattern, which is used for communication materials that do not promote images. In the pattern version, the font size for headlines can be much larger than headlines on the image version.

The area in both versions are divided by the supergraphic, and uses a proportion of 70:30 between the image area and the supergraphic area.

## Information Placement Variations on Out-of-Home Media

Pada media ruang, terdapat faktor-faktor yang mempengaruhi penempatan informasi seperti QR code, alamat website, dan informasi media sosial. Selalu ingat untuk mengutamakan alamat website sebelum informasi lainnya, karena fungsinya adalah sebagai *call to action* utama.

Pada *billboard extreme vertical* dan *square*, kami menyarankan anda untuk menaruh informasi website dan media sosial menjadi 4 baris, di sebelah kanan QR code, dan dengan alamat website sebagai baris pertama.

Pada *billboard standard horizontal*, kami menyarankan anda untuk menaruh informasi website dan media sosial menjadi 2 baris, di sebelah kanan QR code, dan dengan alamat website ditempatkan khusus di baris pertama.

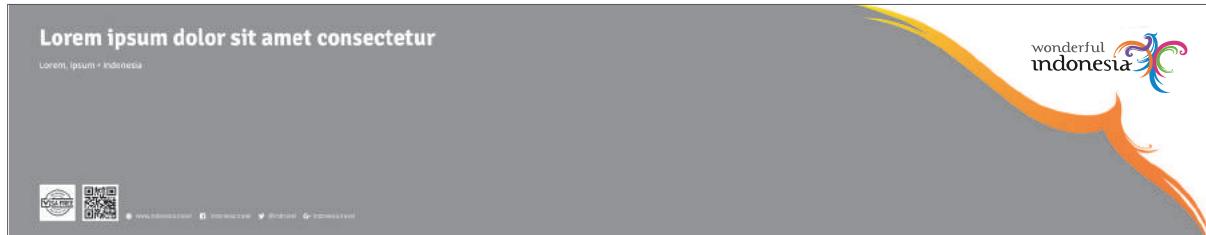

Pada *billboard extreme horizontal*, kami menyarankan anda untuk menaruh informasi website dan media sosial menjadi satu baris, di sebelah kanan QR code, dan dengan alamat website ditempatkan persis setelah QR code.

On out-of-home mediums, there are factors that affect the placement of informations such as the QR code, the website address, and the social media information. Always remember to emphasize the website information firsthand, because it functions as the main call to action.

On vertical, extreme vertical, and square billboards, we recommend you to put the website and the social media information into 4 rows, to the right of the QR code, and with the website information placed on top.

On standard horizontal billboards, we recommend you to put the website and the social media information into 2 rows, to the right of the QR code, and with the website information exclusively placed on the first row.

On extreme horizontal billboards, we recommend you to put the website and the social media information into a single row, to the right of the QR code, and with the website information placed right after the QR code.

**Information Placement Variations on Out-of-Home Media**

Karena QR code tidak bisa ditempatkan pada segala kondisi, sangatlah penting untuk mempertimbangkan penempatan QR code agar ditaruh pada media-media yang memungkinkan untuk diakses oleh orang-orang atau setidaknya oleh kamera *smartphone* mereka.

Ingatlah bahwa penggunaan informasi pada media ruang harus fleksibel sesuai penempatan, tingkat keterbacaan, dan ukuran media tersebut.

Pada kasus tertentu, informasi media sosial, QR code, alamat website dan visa-free dapat dihilangkan untuk meningkatkan efisiensi penggunaan media.

As the QR codes cannot be flexibly placed on all conditions, it is very important to consider putting the QR codes on mediums that are feasible to be reached by people or at least by their smartphone cameras.

Always bear in mind that the distribution of information in out-of-home media must consider the placement, readability, and size of the medium.

In certain cases, infomation about our social media, website, QR code, and visa-free can be omitted to increase the efficiency of using the particular medium.
